

ARTro

the ART of arthroscopy

ARTro is a highly specialized electrosurgical unit dedicated for bipolar and monopolar arthroscopic procedures.

ARTro allows vaporization, cutting and bipolar coagulation in Saline solution. It also offers monopolar cutting and coagulation modes which are necessary in some arthroscopic operations.

SDS system recognizes connected instruments and automatically selects the optimal working parameters. The operating modes and the output settings are selected automatically to the connected instrument.

Automatic regulation of output parameters guarantees fast and effective work.

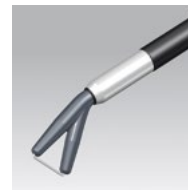

Advantages of the device

- versatile application range: monopolar and bipolar mode

- highly simplified operation
- color display with touchscreen
- advanced bipolar modes for use in Saline solution
- automatic adjustment of the parameters - SpectrumResult
- recognition of the connected devices - SmartDevice System - fast finding of settings to connected tool
- wide range of electrodes in different shapes and sizes
- reusable accessories allowing to reduce the costs of the procedure
- dedicated trolley with convenient case for accessories

SDS bipolar arthroscopic electrodes

58S-010 115 mm Bipolar needle electrode, angled 90°, 0.6 x 1.5mm, SDS cable 3m
58S-030 170mm

58S-020 115 mm Bipolar needle electrode, angled 90°, 0.6 x 4mm, SDS cable 3m
58S-060 170 mm

58S-040 115 mm Bipolar button electrode, angled 90°, 1.5 x 4mm, SDS cable 3m

58S-090 115 mm Bipolar loop electrode "Cobra", SDS cable 3m
58S-011 170 mm

58S-110 115 mm Bipolar vaporization electrode, Phazer, convex, angled 70°, ball 2.4mm, SDS cable 3m
58S-140 170 mm

58S-160 115 mm Bipolar vaporization electrode, VAP, SDS cable 3m
58S-170 170 mm

58S-070 115 mm Bipolar ball electrode, 2.4mm, SDS cable 3m

Instruments with fixed cable

100-610 Electrosurgical Unit ARTro

080-061 TinyLine trolley for ARTro ESU, with case for accessories

100-302 Two-button footswitch, cable 5m, 6-pin plug

Two-button footswitch
